- Butaca de espera de 2 puestos

31.102.78

- Panchetta portacasco 2 posti
- 2 Seater dryer bank
- Banquette porte-casque à 2 places
- 2 Sitzige Trockenbank
- Butaca portacasco de 2 puestos

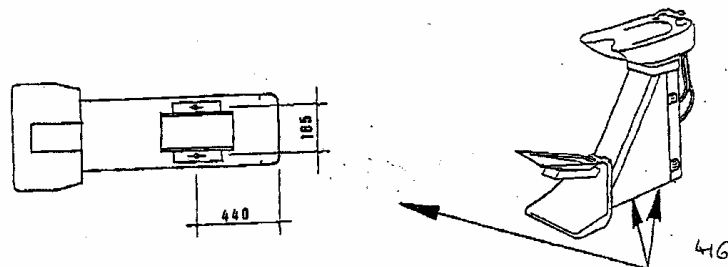

Above dimensions are in centimeters.

Arco All Shampoo System: 22 7/8 inches W x 46 1/2 inches D x 41 inches H

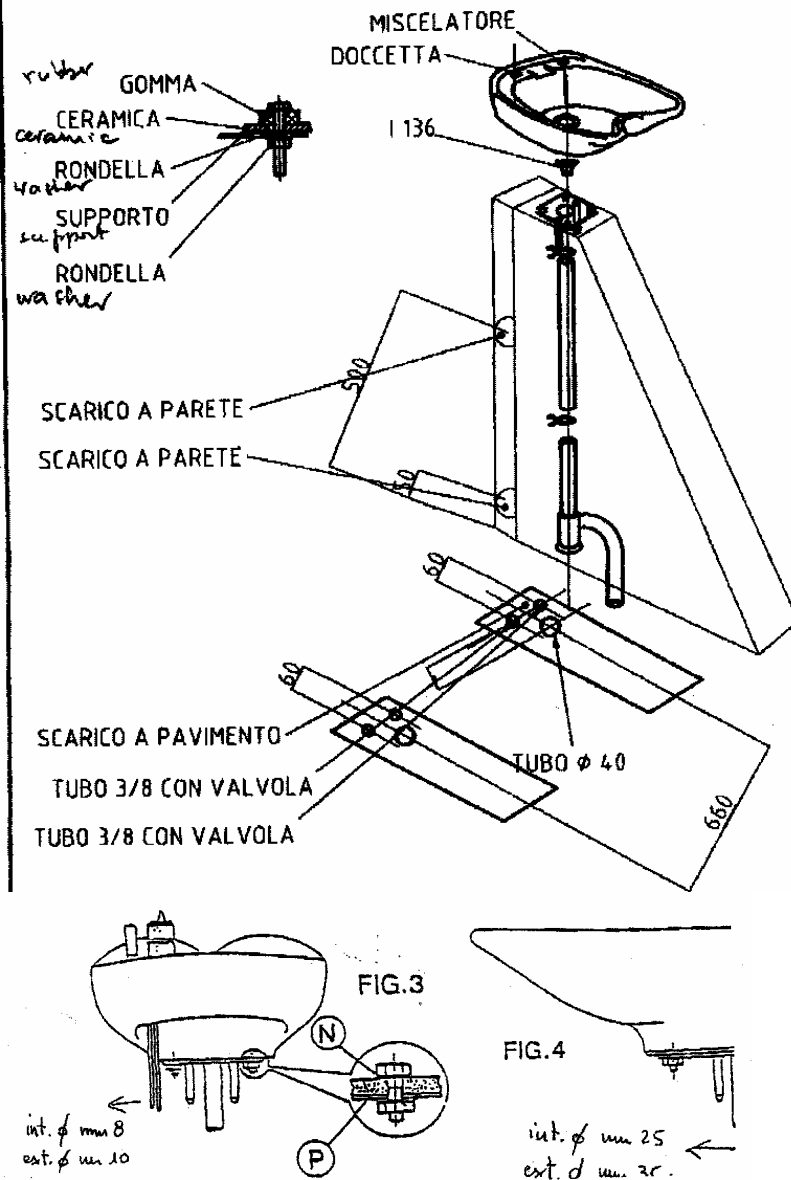

The plumbing area space beneath the shampoo bowl: 8 1/2 inches W x 11 inches D x 26 inches H

The Italian fixtures do not have space for a vacuum breaker. If you are required to have a vacuum breaker, install a back flow preventer system or order the optional (\$50.00 upcharge) American certified plumbing fixture with a built-in vacuum breaker.

Location of fixing holes
measurements in millimeters

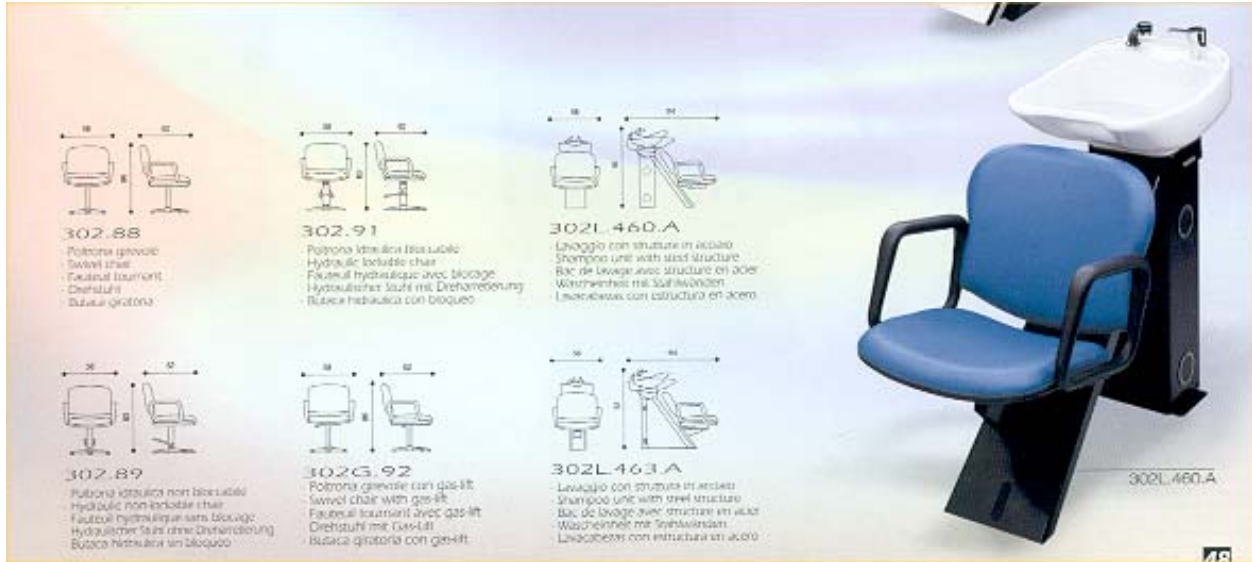

Positioning of hair trap

Mounting Instructions:

1. Determine the correct working position of the shampoo unit.
2. Remove the back panel and fix the shampoo unit to the floor through the slots in the base.
3. Fix the water mixer and the outlet pipe to the basin.
4. Connect the plate (P) to the basin with the brass screws. The rubber washer (N) should be placed inside the basin.
5. Fit the transparent plastic pipe to the bottom of the outlet pipe.
6. Fit the basin assembly to the unit.
7. Connect the mixer pipes, by bending them, to the cold and hot water pipes of the piping system, by means of the fastenings.
8. Reassemble the back panel to the shampoo unit.

Pietranera Hedera Shampoo System dimensions

Above dimensions are in centimeters.

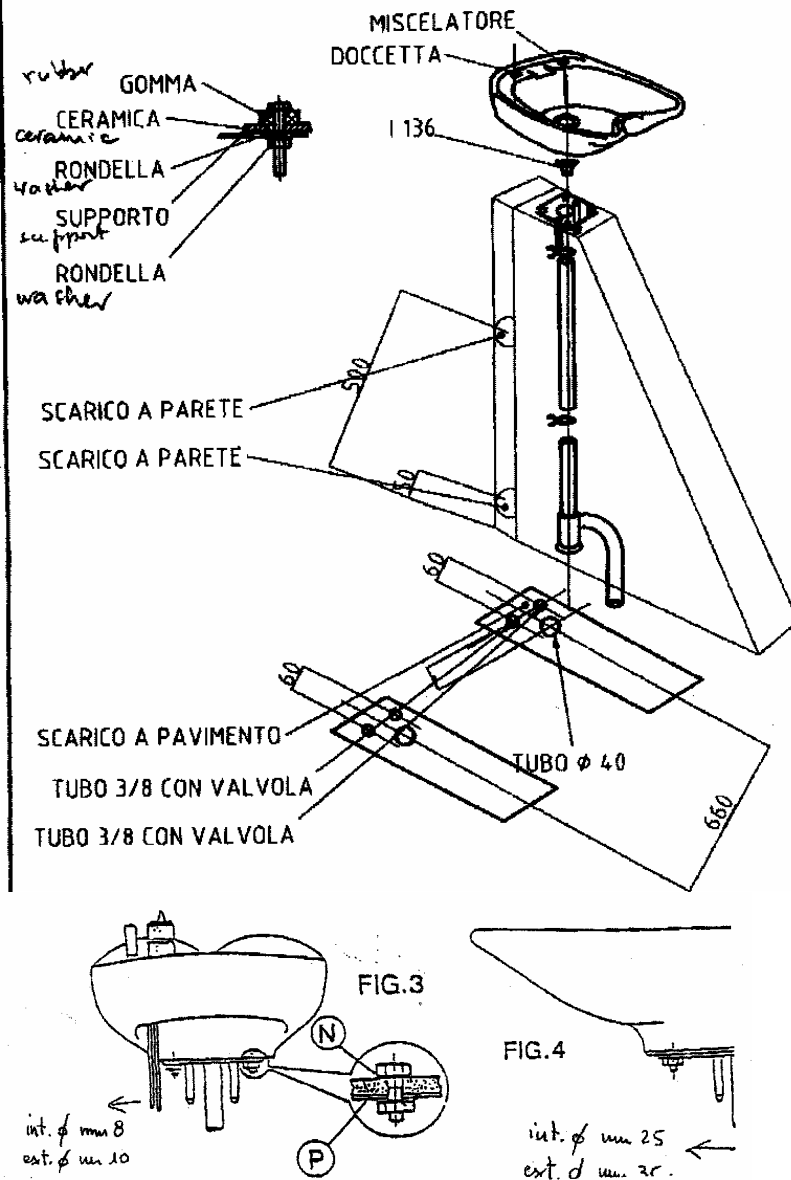

Hedera Shampoo System: 22 7/8 inches W x 44 7/8 inches D x 36 1/4 inches H

The plumbing area space beneath the shampoo bowl: 8 1/2 inches W x 6 3/4 inches D x 27 inches H

The Italian fixtures do not have space for a vacuum breaker. If you are required to have a vacuum breaker, install a back flow preventer system or order the optional (\$50.00 upcharge) American certified plumbing fixture with a built-in vacuum breaker.

3 1/2 inch diameter access holes are located on the side the shampoo bowl column, at 4 inches and 20 inches from the floor.

Positioning of hair trap

Mounting Instructions:

1. Determine the correct working position of the shampoo unit.
2. Remove the back panel and fix the shampoo unit to the floor through the slots in the base.
3. Fix the water mixer and the outlet pipe to the basin.
4. Connect the plate (P) to the basin with the brass screws. The rubber washer (N) should be placed inside the basin.
